## EDUCATION

**General Assembly**  
Washington, DC

Web Development Immersive  
Feb - June 2017

**University of Technology**  
Baghdad

A.A. in Architecture Design  
2006 - 2008

## EXPERIENCE

### GENERAL ASSEMBLY

Web Development Student  
March - June 2017

I learned web development in agile, scrum environment with a focus on functional programming. I developed full-stack apps in JavaScript, Ruby on Rails, MEAN, React / Redux and Node.js. I had the opportunity to work on a group project to build interactive weather and transportation application for DC metro in Angular.js and Ruby on Rails. During my studies, I became familiar with Git and GitHub workflow. Improved on the reliability and readability of source code by following best practices. Focused on planning, modeling and wireframing of web applications.

### Self Employed

Arabic linguist  
2014 - 2017

I translated material in target languages with a focus on accuracy and details. I also worked with a team of translators to deliver projects, meet deadlines and guarantee client satisfaction. I was heavily involved in resource planning, developing schedules and time estimating. I managed a team of five translators and assigned tasks based on the skills of each team member. I was fortunate to develop a cultural training guide for deployed government officials to help them communicate efficiently and ensure their safety.

### CYRACOM

Arabic Interpreter  
2014 - 2017

I interpreted for a wide range of sectors including medical, legal and social services. I also provided clients cultural education to help them make informed decisions. My main focus was to create a fluid experience between parties and eliminated the language barrier. I was grateful to help clients elevate their concerns by communicating their needs directly.
