EDUCATION

General Assembly, DC

Web Development Immersive
Feb - June 2017

University of Technology - Baghdad

A.A. in Architecture Design
2006 - 2008

EXPERIENCE

GENERAL ASSEMBLY

WEB DEVELOPMENT STUDENT
March - June 2017

I learned web development in agile, scrum environment with a focus on functional programming. I developed full-stack apps is javaScript, Ruby on Rails, MEAN, and Node.js. I had the opportunity to work on a group project to build interactive weather and transportation application in Angularjs. During my studies, I became familiar with version control like Git and GitHub. Improved on the reliability and readability of source code by following best practices. Focused on planning, modeling, and wireframing applications.

Self Employed

Arabic linguist
2014 - 2017

I translated material in target languages with a focus on accuracy and details. I also worked with a team of translators to deliver projects, meet deadlines and guarantee client satisfaction. I was heavily involved in resource planning, developing schedules and time estimating. I managed a team of five translators and assigned tasks based on the skills of each team member. I was fortunate to develop a cultural training guide for deployed government officials to help them communicate efficiently and ensure their safety.

CYRACOM

Arabic Interpeter
2014 - 2017

I Interpreted for a wide range of sectors including medical, legal and social services. I also provided clients cultural education to help them make informed decisions. My main focus was to create a fluid experience between parties and eliminated the language barrier. I was grateful to help clients elevate their concerns by communicating their needs directly.
